meetingframe for CoConference in Hotel & Coworking

READ THIS! The size 65" is the perfect balance between small, medium and large rooms and provides the same high experience and quality regardless of room or surface. But it is available from 55" to 85".

The combination as an **all-in-one box**, a **cable-free** interactive touch screen, camera, microphone, speaker, digital whiteboard, AI intelligence and regular updates provide **constant state-of-the-art meeting technology without risk or technical problems**. Packaged as a kiosk to guarantee the best experience and economy without AV or IT.

Connect the to another screen or projector, splitting the presentation from video participants in two separate screens and provide a larger area and better experience.

The already advanced built-in quality camera can may be supplemented with another more powerful PTZ camera.

Special software for CoConference

For maximum reliability and durability (lifespan & environment)

In addition to a CABLE-FREE interactive touch screen, the systems gets updated & upgraded every quarter and are always in mint condition with the latest meeting intelligence – year after year.

Constant remote operation monitoring and reporting to ensure functionality. Detailed complete and individually adapted statistics.

Best financial choice

The market's most sustainable choice. The system does not age, but is constantly updated through regular updates to the latest meeting technology.

You can have a single system cover the needs of an entire conference facility by being moved to the desired area when needed.

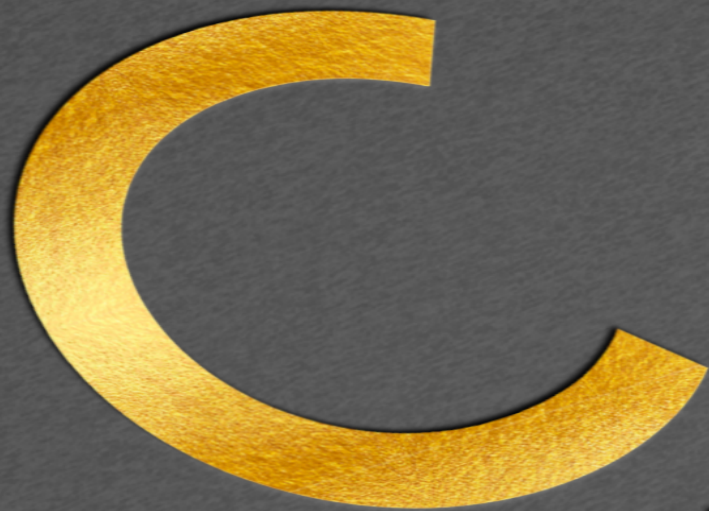

No lost revenue for technical troubleshooting and canceled meetings

No cost for AV installation or IT staff
